COMPETITION MIX®

For all Showjumping, Dressage, Eventing and Endurance horses

- **Dunstan Competition Mix®** is a medium energy, textured feed for all performance horses.
- Ideal for competition horses of all different codes.
- **Dunstan Competition Mix®** contains a lightly molassed blend of **extruded cereals** and protein materials to provide a **medium energy diet** suitable for horses requiring a quality performance feed with highly digestible ingredients.
- The inclusion of cooked **extruded cereals** supplies a **readily available energy source**, but in a **highly digestible** form which is less likely to cause digestive upsets as a result of excessive fermentation in the caecum or hind gut.
- Oil is supplied as a **Vegetable Oil** blend to **enhance skin and coat condition**.
- The inclusion of the super fibre **Soya Hulls** contributes quality fibre to **Dunstan Competition Mix**.
- **Dunstan Competition Mix®** contains a comprehensive formula of minerals. Minerals are provided as glycinate organic trace minerals resulting in improved bio-availability. This ensures maximum feed and nutrient utilisation, also **aiding development of the natural immune system**.
- **Organic Selenium** as **Selenium Yeast** is included to provide a **highly available** and **safe** form of **Selenium**.
- Includes **Natural Vitamin E**.

Extruded/Cooked **Maize**,
 Extruded/Cooked **Barley**,
 Extruded/Cooked **Wheat**
By-Product, Peas, Soya Hulls ,
Vegetable Oil, Dicalcium
Phosphate, Molasses, Salt (providing electrolytes), **Sunflower Seeds,**
Limestone (for Calcium). Contains a comprehensive formula of **Organic Amino Acid Mineral Complexes, Organic Selenium Yeast & Vitamins.** **Heat stable Vitamins** added at time of manufacture.

Typical Analysis (Dry Matter Basis)

• Crude Protein.....	12 %
• Fat.....	7.5 %
• Fibre.....	11 %
• Salt.....	2 %
• Energy DE.....	14.0 MJ/Kg

Nutrient Composition – per kilo of Dunstan Competition Mix®

• Crude Protein.....	110 g
• Calcium.....	10.0 g
• Phosphorus.....	4.0 g
• Sodium.....	4.0 g
• Chloride.....	8.0 g
• Potassium.....	10.0 g
• Magnesium.....	2.0 g
• Iron.....	220 mg
• Zinc (Organic).....	130 mg
• Manganese.....	110 mg
• Copper (Organic).....	50 mg
• Cobalt.....	0.5 mg
• Iodine.....	1.0 mg
• Selenium (Organic).....	0.4 mg
• Vitamin A.....	10,000 i.u.
• Vitamin D.....	1,000 i.u.
• Vitamin E.....	125 mg
• Vitamin K.....	2 mg
• Thiamine B1.....	6 mg
• Riboflavin B2.....	6 mg
• Pyridoxine B6.....	5 mg
• Vitamin B12.....	50 ug
• Niacin.....	20 mg
• Pantothenate.....	10 mg
• Biotin.....	100 ug
• Folic Acid.....	1.5 mg
• Choline.....	150 mg

Heat stable Vitamins added at time of manufacture.

FEEDING RECOMMENDATIONS:

Dunstan Competition Mix

Spelling	2kg per day
Light Work	2kg - 3kg per day
Moderate Work	3kg - 4kg plus per day

FEEDING NOTES:

- The above recommended feeding rates are based on a 500kg horse and are guidelines only. Daily feed amounts will vary depending on pasture availability and body condition. Horses are very much individuals with different metabolic efficiencies, some require a little more, others a little less, for the same level of activity.
- It is advisable to split the above daily quantities into at least two feeds, preferable 3- 4.
- Total feed intake should range between 2%-3% of the horses bodyweight per day.
- Ensure adequate fibre intakes by providing 1%-1.5% per day of the horse's body weight as chaff, hay, **Dunstan Betabeet/Sugarbeet** or pasture (on a DryMatter basis).
- As intensity of training increases a step up to **Dunstan Sporthorse** is recommended.
- For horses spelling and maintaining body condition on pasture alone use **Dunstan Multi-Ultra**.

GENERAL NOTES:

Always ensure the horse has access to clean drinking water. High Copper levels in **Dunstan Competition Mix** make it unsuitable for feeding to sheep.

Dunstan Horse Feeds are produced in Equine-Safe manufacturing plants.

Professionally formulated for New Zealand horses performing under New Zealand conditions
