• Fat.....	6.0 %
• Salt.....	1.2 %
• Energy DE.....	15.0 MJ/Kg

NUTRIENT COMPOSITION – Typical Analysis per kilo of Dunstan Feed-Up (as fed)

• Crude Protein.....	135g minimum
• Lysine.....	8g
• Calcium.....	11g
• Phosphorus.....	2.0g
• Sodium.....	4.0g
• Chloride.....	8.0g
• Potassium.....	10.0g
• Magnesium.....	2.5g
• Iron.....	140mg
• Zinc (Organic).....	100mg
• Manganese.....	70mg
• Copper (Organic).....	35mg
• Cobalt.....	0.2mg
• Iodine.....	0.8mg
• Selenium (Organic).....	0.35mg
• Vitamin A.....	10,000i.u
• Vitamin D.....	1,000i.u
• Vitamin E.....	115mg
• Vitamin K.....	2.0mg
• Thiamine B1.....	6.0mg
• Riboflavin B2.....	6.0mg
• Pyridoxine B6.....	5.0mg
• Vitamin B12.....	50ug
• Niacin.....	20mg
• Pantothenate.....	10mg
• Biotin.....	100ug
• Folic Acid.....	1.5mg
• Choline.....	150mg

Heat stable Vitamins added at the time of manufacture

FEEDING RECOMMENDATIONS

(Rates per horse per day)

Weanlings	2.5kg - 4kg
Yearlings	3.0kg - 5kg

FEEDING NOTES

- The above recommended feeding rates for **Dunstan Feed-Up** are based on a mature weight of 500kg and are guidelines only. Daily feed amounts will vary depending on pasture availability and body condition. Horses are very much individuals with different metabolic efficiencies, some require a little more, others a little less, for the same level of activity.
- Ensure adequate fibre intakes by providing 1 %-1.5% per day of the horse's body weight as chaff, hay, **Dunstan Betabeet/Sugarbeet** or pasture (on a Dry Matter basis).
- It is advisable to split the daily hard feed into at least two feeds, preferable 3-4, but feed no more than 2.0 kg of **Dunstan Feed-Up** per meal.
- Always introduce a new feed gradually over a period of 7 – 10 days, working up to the desired feed intake taking into consideration body condition and work level.

GENERAL NOTES:

Always ensure the Horse has access to clean drinking water.
High Copper levels in **Dunstan Feed-Up** make it unsuitable for feeding to sheep.
