Available from your local Horse Feed Retailer

formulated specifically for Yearlings and is the ideal complete feed for Yearling Sales Preparation.

- **Dunstan Yearling Mix** is formulated to meet the nutrient requirements of the growing Yearling in a palatable, complete feed.
- Fully balanced, **Dunstan Yearling Mix** provides a complete profile of macro and micro ingredients in a palatable complete feed to supplement forage intake.
- The diet is formulated around an **extruded pellet** to match the nutrient requirements of the growing Yearling from twelve months of age. The diet is of a **high nutrient specification** utilising Dunstan's extrusion technology for processing cereals.
- As the ideal **complete feed for Sales Preparation**, additional Vegetable Oils are included within this feed to **aid coat sheen and general appearance**.
- Ingredients are selected for their digestibility and nutrient availability, to achieve desired growth rates while providing **key nutrients for sound bone and joint development**.

## FEEDING RECOMMENDATIONS

**Yearlings 2.5kg – 4kg per day**

**Sales Preparation 4kg – 6kg per day**

**Dunstan Yearling Mix** is a full feed and therefore is formulated to be fed at a minimum of 2.5kg daily to provide adequate vitamin and mineral supplementation (based on a 500kg mature body weight). If the Yearling's body condition does not require an intake of 2.5kg or greater of **Dunstan Yearling Mix** then a 'semi concentrate' - **Dunstan Grass Balancer** - is recommended, to ensure adequate vitamin and mineral fortification of the diet.

### FEEDING NOTES

- The above are based on a mature weight of 500kg and are guidelines only. Daily feed amounts will vary depending on pasture availability and body condition. Horses are very much individuals with different metabolic efficiencies, some require a little more, others a little less, for the same level of activity.
- **Ensure adequate fibre intakes by providing 1% - 1.5% per day of the horse's body weight as chaff, hay, Dunstan Betabeet/Sugarbeet or pasture (on a Dry Matter basis).**
- It is advisable to split the daily hard feed into at least two feeds, preferable 3-4, but feed no more than 2.0 kg of **Dunstan Yearling Mix** per meal.
- Always introduce a new feed gradually over a period of 7 – 10 days, working up to the desired feed intake taking into consideration body condition and work level.

### GENERAL NOTES

Always ensure the Horse has access to clean drinking water.  
High Copper levels in **Dunstan Yearling Mix** make it unsuitable for feeding to sheep.

## INGREDIENTS

**Maize, Oats, Barley, Broll (Wheat by-product), Extracted Soya Meal, Fibre Pellet, Soya Bean Oil, Molasses, Dicalcium Phosphate, Limestone, Methionine, Lysine, Salt, Mineral and Vitamin Premix, Threonine, Sucram Flavouring.**
