Available from your local Horse Feed Retailer

A Low Starch, Semi-Concentrate Performance Muesli

- A **low starch feed** ideal for horses that do not tolerate high starch rations for behavioural or physiological reasons.
- As a **semi-concentrate muesli**, **Dunstan Resolve** has an **elevated** inclusion of **key nutrients**, therefore making it ideal for **'good doers'** and those that do not require the higher intakes of a traditional 'full feed'.
- Contains **Melofeed®**, a natural source of primary **antioxidants** that assist in maintaining cartilage integrity for **joint health** in the performance horse.
- **Antioxidant** properties of **Melofeed®** benefit equine muscle membrane, helping to **prevent muscle lesions** that may occur in horses during intense exercise.
- **Dunstan Resolve** includes the highly digestible **'Super-fibres'** **Sugarbeet** and **Soya Hulls**, providing quality fibre for **equine digestive health** and **'cool energy'** for controlled performance.
- **Lupins** are a key ingredient in **Dunstan Resolve**. **Lupins** are **low in starch, calorie-dense** and provide energy to **perform** while maintaining a **focused mind** for the competition horse. The **high fibre** nature of **Lupins** results in **efficient hindgut digestion**, an essential benefit in all equine diets.
- **Dunstan Resolve** includes an elevated level of **Biotin** to assist with **hoof growth** and **hardness**.
- An **elevated** inclusion level of **Vegetable Oil** in **Dunstan Resolve** provides a concentrate source of **'cool' calories** to meet the energy demands of the sporthorse for both **body condition** and **performance**.
- Addition of **Vegetable Oil** enhances **skin** and **coat condition**.
- **Organic Trace Minerals** and **Selenium Yeast** ensure maximum **availability** of these important minerals.
- **Natural Vitamin E** included for improved **bio-availability**.
- **Dunstan Resolve's low-starch, Oat-free formulation**, combined with elevated levels of key antioxidants **Selenium, Vitamin E** and the addition of **Melofeed®** make it an ideal form of supplementary feed for horses prone to **'tying-up'**.

INGREDIENTS: Soya Hulls, Sugarbeet, Lupins, Fibre Pellet, Soyabean Oil, Molasses, Sunflower Seeds, Crushed Peas, Soyabean Extract, Brollard, Limestone, Salt, Dicalcium Phosphate, Magnesium Oxide, Sucram, Apple Flavour, Melofeed®, Vitamins and Minerals.

TYPICAL ANALYSIS (Dry Matter Basis)

• Crude Protein	16.5%
• Fat	12%
• Fibre	16%
• Salt	1.5%
• DE Energy	14MJ/kg

Nutrient Composition – typical analysis per kg Dunstan Resolve (as fed)

• Crude Protein	145g
• Lysine	10g
• Starch	90g
• Calcium	10g
• Phosphorus	6.0g
• Sodium	6.0g
• Chloride	10g
• Potassium	10g
• Magnesium	8.0g
• Iron	200mg
• Zinc (organic)	200mg
• Manganese	150mg
• Copper (organic)	75mg
• Cobalt	0.5mg
• Iodine	1.5mg
• Selenium (organic)	0.9mg
• Vitamin A	10000iu
• Vitamin D	1000iu
• Vitamin E	500iu
• Vitamin K	8.0mg
• Vitamin B1	12.0mg
• Vitamin B2	12.0mg
• Vitamin B6	8.0mg
• Vitamin B12	50ug
• Niacin	40mg
• Pantothenate:	20mg
• Biotin	7.5mg
• Folic Acid	3.0mg
• Choline	300mg
• Melofeed®	100mg

Heat stable vitamins added at the time of manufacture

FEEDING RECOMMENDATIONS

(Amounts per horse per day when offered as the sole concentrate). The recommended feeding rates are based on a 500kg horse and are guidelines only.

Spelling	1.2 – 1.5kg per day
Light work	1.5 – 2.0kg per day
Moderate work	2.0 – 2.5kg per day
Heavy work	2.5 – 3.0kg per day

The recommended intakes above for each work category is the minimum amount of **Dunstan Resolve** required to provide a **full profile** of vitamins and minerals to the diet (in conjunction with pasture/hay).

NOTES:

- Divide the daily feed into as many feeds as possible, at least two, preferably three or four, but feed no more than 2.0kg of Dunstan Resolve per feed.
- Always ensure good quality fibre is fed in conjunction with Dunstan Resolve eg: Dunstan Sugarbeet or Dunstan Betabeet, chaff and/or hay.
- If pasture is limited, increased levels of fibre must be added to the diet. The minimum requirement of 1.0% of the horses body weight must be fed as fibre each day (on a dry matter basis).
- Always ensure horses have access to clean drinking water.
- For overzealous eaters, to reduce issues associated with horses that 'bolt their feed' dampen the feed and add fibre.
- High Copper levels in this feed make it unsuitable for feeding to sheep.

EQUINE SAFE: Dunstan Horsefeeds are produced in Equine Safe manufacturing plants ensuring a product of premium quality, safety and performance. Professionally formulated for New Zealand Horses performing under New Zealand conditions
