EXTRUDED RICE

Cool, non-heating energy source for all horses

- **Dunstan Extruded Rice with Rice Bran Oil** is formed through the extrusion of polished white rice after mixing with **Rice Bran Oil**.
- **Dunstan Extruded Rice with Rice Bran Oil**, like the cereals Maize, Barley and Oats, is a carbohydrate source, noted for its **contribution to digestible energy in the horses diet**.
- **Cool Energy – Dunstan Extruded Rice** provides a non-heating energy source due to its high digestibility, avoiding ‘excitability’ associated with hind-gut fermentation.
- **Dunstan Extruded Rice with Rice Bran Oil** is a calorie dense feed, making it ideal for hard working horses and those which require weight gain.
- Rice is often said to be ‘anti-allergenic’ and for animals that react to gluten, rice is often used as a cereal substitute.
- **Rice Bran Oil** is included in this product to complement the energy status of rice. However, within **Rice Bran Oil** is a natural compound, **Gamma Oryzanol**, known for its effect on **muscle integrity and development**.
- **Dunstan Extruded Rice with Rice Bran Oil** is well digested by the horse and therefore provides for a readily available energy source, without the risk of hind gut fermentation which often leads to digestive upset or colic.

FEEDING RECOMMENDATIONS	NOTE
<p>It is suggested that Dunstan Extruded Rice with Rice Bran Oil forms part of the horses diet to provide a variety of energy sources.</p> <ul style="list-style-type: none"> • Racework/High Energy Work: Feed 0.5 - 1.5kg per horse per day depending on activity level. • Conditioning Feed: Feed 0.5 - 1.5kg per horse per day according to body weight. 	<p>As with all cereals, avoid feeding in single, large meals. Preferably split the daily feed amount into 2 or preferably 3 feeds per day. Always ensure the horses requirements for fibre/ roughage is met (a minimum of 1% of the horses bodyweight of fibre must be fed per day).</p>

<p>The combination of Dunstan Extruded Rice with Rice Bran Oil will provide the following nutritional benefits:</p> <ul style="list-style-type: none"> • Muscle Building/Body Conditioning, particularly important in growing horses, racehorses in work and all horses being worked at high energy levels. • A non-heating, cool energy and highly digestible component to the diet for all horses. • Assists in the prevention of ‘tying up’ in horses through the provision of a cooked cereal source. • Enhanced coat sheen.
