

Love your horse®

Dunstan Move Free

A Textured Feed formulated for Horses prone to 'Tying Up'.

- Super Fibres
- Low Starch
- Elevated levels of key antioxidants
- Organic Minerals
- Selenium Yeast
- Natural Vitamin E
- Includes Melofeed®
- Addition of a Live Yeast
- Extruded Grains
- Includes Chromium

A Textured Feed, formulated for Horses prone to 'Tying Up'

- **Dunstan Move Free** is ideal for horses with high energy demands for performance that do not tolerate high grain diets, instead benefitting from a **low starch** ration, due to physiological or behavioural needs.
- **Dunstan Move Free** is a calorie-dense formulation suitable for all horses prone to tying up.
- The inclusion of **Super Fibres (Sugarbeet and Soya Hulls)** provide calories from **low starch, quality fibre** sources, not only to assist in managing 'tying-up', but also for digestive health.
- **Steam Flaked Lupins** contribute a low starch, high protein, high fat, energy-dense ingredient ideal for the working horse.
- **Dunstan Move Free** contains **Melofeed®**, a natural source of primary **antioxidants**. The antioxidant properties of **Melofeed®** benefit equine muscular health by assisting to maintain cell membrane integrity and helping to **prevent muscle lesions** that may occur in horses during intense training.
- **Melofeed®** assists in reducing oxidative stress and is therefore beneficial in maintaining cartilage integrity for **joint health** in the performance horse.
- **Dunstan Move Free** utilises extrusion technology in an **Oat free diet**, with the cereal portion provided as **Extruded Barley**. The inclusion of **Barley** in its **extruded** form supplies a readily available energy source, but in a highly digestible form which is less likely to cause digestive upsets as a result of excessive fermentation in the caecum and hindgut.
- **Vegetable Oil** provides an additional calorie source of key importance in the equine athlete pre-disposed to 'tying-up'.
- Minerals are provided as **Glycinate Organic Trace Minerals** resulting in **improved bio-availability**. This ensures maximum feed and nutrient utilisation, also **aiding development of the natural immune system**.
- **Selenium** and **elevated levels of Vitamin E** are included in this formula, with **Selenium** provided in the more available form of **Selenium Yeast** and **Vitamin E** as **Natural Vitamin E**.
- **Additional electrolytes** such as **Potassium Chloride** and **Magnesium Oxide** are included to **aid muscle integrity and assist in reducing anxiety** from Magnesium deficiency.
- **Chromium Yeast** is included as an aid to overall energy utilisation and as an agent to **help reduce lactic acid accumulation**, a factor often associated with tying up.

FEEDING RECOMMENDATIONS - Guidelines

(Amounts per horse per day when offered as the full feed)

Light Work	2.5kg - 3kg
Moderate Work	3.0kg - 4kg
Hard Work	4.0kg - 5kg

The above recommended feeding rates for **Dunstan Move Free** are based on a 500kg horse and are guidelines only. Daily feed amounts will vary depending on pasture availability, body condition and individual metabolic rate.

FEEDING NOTES

- Ensure adequate fibre intakes by providing 1% - 1.5% per day of the horse's body weight as **Dunstan Betabeet/Sugarbeet**, chaff, hay or pasture (on a Dry Matter basis).
- For horses pre-disposed to 'tying-up', if additional calories are required in the ration and the recommended intakes of **Dunstan Move Free** are being fed, utilise **Dunstan Betabeet** as an ideal calorie supplement. **Dunstan Betabeet** is low in starch and sugar and will contribute quality fibre to the ration.
- It is advisable to split the daily hardfeed into at least two feeds, however feed no more than 2.0 kg of **Dunstan Move Free** per meal.
- Always introduce a new feed gradually over a period of 7 - 10 days.
- Always ensure the Horse has access to clean drinking water.
- High Copper levels in **Dunstan Move Free** make it unsuitable for feeding to sheep.

INGREDIENTS:

Soya Hulls, Sugarbeet, Steam Flaked Lupins, Extruded Barley, Bran & Pollard, Fibre Pellet, Soyabean Oil, Molasses, Crushed Peas, Sunflower Seeds, Salt, Magnesium Oxide, Vitamins and Minerals, Potassium Chloride, Melofeed®, Chromium Yeast and Selenium Yeast.

Typical Analysis (Dry Matter Basis)

Crude Protein.....	14.5 %
Fibre.....	16.0 %
Fat.....	12.0 %
Salt.....	2.0 %
Digestible Energy.....	14.5 MJ/Kg

Nutrient Composition – typical analysis per kilo of **Dunstan Move Free** (as Fed)

Starch.....	10%
Protein.....	130g
Lysine.....	8g
Calcium.....	10g
Phosphorus.....	4g
Sodium.....	5.5g
Chloride.....	12%
Potassium.....	11g
Magnesium.....	4g
Iron.....	300mg
Zinc (Organic).....	180mg
Manganese.....	120mg
Copper.....	60mg
Cobalt.....	0.7mg
Iodine.....	1.6mg
Selenium.....	0.7mg
Vitamin A.....	12,000iu
Vitamin D.....	1200iu
Vitamin E.....	535iu
Vitamin K.....	2.5mg
Thiamine B1.....	7.5mg
Riboflavin B2.....	7.5mg
Pyridoxine B6.....	6.5mg
Vitamin B12.....	65mcg
Niacin.....	25mg
Pantothenate.....	12mg
Biotin.....	250mcg
Folic Acid.....	2.0mg
Choline.....	450mg
Melofeed®.....	40mg

Heat stable Vitamins added at time of manufacture.
