# PRE-TRAINER®

Dunstan Pre-Trainer Mix® is formulated as a follow-on diet to Dunstan Yearling Mix.

• **Dunstan Pre-Trainer®** is designed for Yearlings returning from Sales and being held in good body condition under various stages of breaking-in and training. Adjustment to feed allowances will reflect on the amount of training and exercise being undertaken.

• **Pre-Trainer Mix®** is based on Dunstan's extrusion technology where cereals are cooked to enhance **digestion and palatability**. Ingredients are selected for their digestibility and nutrient availability to **maintain growth rate and for training purposes**.

### INGREDIENTS

**Oats, Barley, Fibre Pellet, Extruded Wheat by-products, Extracted Soya Meal, Vegetable Oil, Molasses, Dicalcium Phosphate, Limestone, Salt, Mineral and Vitamin Premix, Lysine.**

### Typical Analysis (Dry Matter Basis)

- Crude Protein..... 12.0 %
- Fibre..... 7.0 %
- Fat..... 8.5 %
- Salt..... 1.5 %
- Energy DE..... 15.0 MJ/Kg

### Nutrient Composition – per kilo of Dunstan Race Mix (as fed)

- Crude Protein..... 110 g
- Calcium..... 11.0 g
- Phosphorus..... 5.0 g
- Sodium..... 4.0 g
- Chloride..... 7.5 g
- Potassium..... 9.0 g
- Magnesium..... 2.0 g
- Iron..... 170 mg
- Zinc (Organic)..... 130 mg
- Manganese..... 110 mg
- Copper (Organic)..... 50 mg
- Cobalt..... 0.5 mg
- Iodine..... 1.0 mg
- Selenium (Organic)..... 0.4 mg

- Vitamin A..... 10,000 i.u.
- Vitamin D..... 1,000 i.u.
- Vitamin E..... 125 mg
- Vitamin K..... 2.0 mg
- Thiamine B1..... 6.0 mg
- Riboflavin B2..... 6.0 mg
- Pyridoxine B6..... 5.0 mg
- Vitamin B12..... 50 ug
- Niacin..... 20 mg
- Pantothenate..... 10 mg
- Biotin..... 100 ug
- Folic Acid..... 1.5 mg
- Choline..... 150 mg

Heat stable Vitamins added at time of manufacture.

### FEEDING RECOMMENDATIONS

(Amounts per horse per day when offered as the full feed)

Maintenance	2.0kg
Light work	2.5kg - 3.5kg
Moderate work	3.5kg - 5.0kg

### FEEDING NOTES

- Daily feed amounts will vary depending on pasture availability and body condition. Horses are very much individuals with different metabolic efficiencies, some require a little more, others a little less, for the same level of activity.
- Ensure adequate fibre intakes by providing 1% - 1.5% per day of the horse's body weight as chaff, hay, **Dunstan Betabeet/Sugarbeet** or pasture (on a Dry Matter basis). It is advisable to split the daily hard feed into at least two feeds, preferable 3-4, but feed no more than 2.0 kg of **Dunstan Pre-Trainer Mix®** per meal.
- Always introduce a new feed gradually over a period of 7 - 10 days, working up to the desired feed intake taking into consideration body condition and work level.

### GENERAL NOTES:

Always ensure the Horse has access to clean drinking water. High Copper levels in **Dunstan Pre-Trainer Mix®** make it unsuitable for feeding to sheep.

**EQUINE SAFE:** Dunstan Horsefeeds are produced in Equine Safe manufacturing plants ensuring a product of premium quality, safety and performance. Professionally formulated for New Zealand Horses performing under New Zealand conditions
