A Premium, High-Energy Feed for all Performance Horses

- **Dunstan Sporthorse** is a premium high-energy complete feed. It includes **extruded cereals** for improved digestibility, and therefore it is less likely to cause digestive upsets as a result of excessive fermentation in the caecum or hind-gut.
- Includes **Oats**, a highly digestible grain for horses, further enhancing the **energy density** and highly digestible nature of **Dunstan Sporthorse**.
- The addition of **Vegetable Oil** enhances **skin** and **coat condition** and contributes an alternative concentrate source of calories to **Dunstan Sporthorse**.
- **Dunstan Sporthorse** contains a **comprehensive** formula of **Minerals**.
- Minerals are provided as **Glycinate Organic Trace Minerals** resulting in improved bio-availability. This ensures maximum feed and nutrient utilisation, **also aiding development of the natural immune system**.
- **Organic Selenium** as **Selenium Yeast** is included, to provide a **highly available** and **safe** form of **Selenium**.
- **Chromium Yeast** is an addition to **Dunstan Sporthorse** that enhances performance through improved energy utilisation and lactic acid reduction.
- **Dunstan Sporthorse** includes highly **bio-available Natural Vitamin E**.

INGREDIENTS

Extruded/Cooked Maize, Extruded/Cooked Barley, Extruded/Cooked Wheat By-Product, Oats, Fibre Pellets, Peas, Sunflower Seeds, Vegetable Oil, Dicalcium Phosphate, Molasses, Salt, Limestone (for Calcium), Live Yeast, Chromium. Contains a comprehensive formula of Organic Amino Acid Mineral Complexes, Organic Selenium Yeast, Vitamins, Natural Vitamin E.

Typical Analysis

(approximate on a Dry Matter Basis)

Crude Protein	10.0%
Fat	8.0%
Fibre	7.5%
Salt	2.0%
DE Energy	15.0MJ/kg

Nutrient Composition

Typical Analysis per kg of Dunstan Sporthorse (as fed)

Crude Protein	90g
Calcium	9.0g
Phosphorus	4.0g
Sodium	6.0g
Chloride	10.0g
Potassium	7.0g
Magnesium	1.6g
Iron	140mg
Zinc (Organic)	130mg
Manganese	110mg
Copper (Organic)	50mg
Cobalt	0.4mg
Iodine	1.0mg
Selenium (Organic)	0.35mg
Vitamin A	10,000 i.u
Vitamin D3	1,000 i.u
Vitamin E	125 i.u
Vitamin K	2.0mg
Thiamine B1	6.0mg
Riboflavin B2	6.0mg
Pyridoxine B6	5.0mg
Vitamin B12	50ug
Niacin	20mg
Pantothenate	10mg
Biotin	100ug
Folic Acid	1.5mg
Choline	150mg

Heat stable Vitamins added at the time of manufacture

FEEDING RECOMMENDATIONS

Amounts per horse per day when offered as the full feed

Light Work	2kg – 3kg
Moderate Work	3kg - 4kg
Hard Work	4kg – 6kg

The above feeding rates for **Dunstan Sporthorse** are guidelines only and are based on a 500kg horse. Feed amounts will vary depending on pasture availability, body condition and an individual metabolic rate.

FEEDING NOTES

- Divide the daily feed into as many feeds as possible, at least two, but feed no more than 2kg of **Dunstan Sporthorse** per feed.
- If pasture is limited, increased levels of fibre must be added to the diet. The minimum requirement of 1.0% of the horse's body weight must be fed as fibre each day, (on a dry matter basis). Supplementary fibre can be provided in the form of hay, chaff and **Dunstan Beta-beet/Dunstan Sugarbeet**.
- Always introduce a new feed gradually over a period of 7 - 10 days.
- Always ensure the horse has access to clean drinking water.
- High Copper levels in **Dunstan Sporthorse** make it unsuitable for feeding to sheep.

Dunstan Horse Feeds are produced in Equine-Safe manufacturing plants.

Professionally formulated for New Zealand Horses performing under New Zealand conditions
